

REMARKS

The Examiner has indicated that claims 1, 2, 4, 6-9, 11, 12 and 14-36 are allowable. The Examiner, however, has objected to claims 9, 11, 12, 14-19, 27-29, 31 and 32 as allegedly containing features not discussed in the specification. Specifically, the Examiner maintains that the first and second holding portions and the coil filaments are not discussed in the specification. Applicant respectfully traverses the Examiner's assertion. All recited features are discussed throughout the specification using the exact terminology recited in the claims. Furthermore, at least Figure 27 depicts the exact configuration recited in the claims in question.

To aid in the Examiner's understanding of Figure 27, Applicant provides herewith an annotated drawing which labels each feature as it is set forth in the claim. As stated above, the features described in the annotated figure are already adequately described in the specification such that no further amendments are necessary. The drawing provided is labeled as "Attachment A" and also is labeled for Examiner Reference not to be officially entered.

In view of the above, reconsideration and allowance of this application are now believed to be in order, and such actions are hereby solicited. If any points remain in issue which the Examiner feels may be best resolved through a personal or telephone interview, the Examiner is kindly requested to contact the undersigned at the telephone number listed below.

The USPTO is directed and authorized to charge all required fees, except for the Issue Fee and the Publication Fee, to Deposit Account No. 19-4880. Please also credit any overpayments to said Deposit Account.

Respectfully submitted,
